The Smart Girl Has Invented the Little, Rosy-Cheeked Groom, Who Trots at Her Heels and Is an Ornamental Acquisition.

(Correspondence of the Dispatch.) NEW YORK, April 13 .- Austy's Roman conqueror, followed by a flute, was never more closely accompanied in all his comings and goings than is the smart girl of the season by her little groom. He is her special innovation and invention, looked upon as something of a guide, a good deal of a chaperon, but chiefly intended for the ornamentation and convenience of that portion of her daily life spent out of doors.

He is a lad anywhere from 14 to 16 years of age, robust, over 4 feet 11 inches tall, as slender as a jockey, rosy as a peach, endowed with all the grace of a dancing master, the dignity of a butleand is liveried with much splender, and variety for every quarter of the day and its duties.

He is supposed to be the natural exclution of the modern young woman's love for open air recreation, for dogs, and horses, bleyeling, and golfing that reem now to constitute the chief end and aim of her existence.

IN THE PARK.

When she goes to drive in the park, as she always begins to do directly spring weather arrives, her little groom sits in billy cock-hat of tan beaver, showing a high white cockade; in short double-breasted tan melion coat that has two shoulder-capes, and patent leather boots turned over with doe-skin tops on the back seat of her mail phaeton bestle her

It will thicken like a mayonnaise made with oil, and, indeed, this real Hollandaise sauce is nothing but a warm mayonnaise where the oil is replaced by butter. French people are so fond of salad that their dinner is almost invariably accompanied by one.
The mixture of cherville French, cerfeuil), targon, and chives is a great addition to all salads. A most delicious flavor. The chives and targon are well enough known, but not the cherville, which is a small plant, very much like parsley, but having an entirely different flavor. The leaves are very fine, and they are of a more delicate shade of green. It can be found at all big markets, However, cherville can be raised easily in the back yard, or even in a wooden box. It does not like too much sun.
Beets require to be cooked a long time warmer on the kitchen range, place them in hot water for two or three minutes be-

BOILED SALMON.
Salmon is at its best from the 1st of April until the end of July. The freshness of fish can be distinguished by the prilliancy of the skin and eyes are dull the fish is not fresh. Highly-colored salmon is the best, whitish flesh denotes inferior quality.

The water in which fish is boiled and to which ingredients are added is called in French a court-bouillon.

Wash the fish and put it in a vessel with sufficient cold water to cover it; then throw in salt, pepper, bay leaves, thyme, the salt, pepper, and vinegar in the salad-spoon, and mix well with the fork. When the salt and pepper are melted, spread the vinegar over the salad, and then the oil. With fork and spoon stir diligently for at least five minutes, and serve.

There is certainly one very nice feature about being a potentate, and that is the income that comes to the occupant of a lofty place. Besides having all his wants attended to, and a large number of palaces always at his disposal, the Emperor of Russia is said to receive \$25,000 a day; the Sultan of Turkey receives \$18,000 a day; the Emperor of Austria rejoices in \$19,000 a day; Emperor William has to get along on \$8,000 from breakfast to bedtime; Queen Victoria has \$5,000 to spend every week, and the President of the United States receives a trifle under a thousand dollars a week, but a great deal of free advertising goes with the office.

THE INTRODUCTION OF SOME NEW MANCHURIA JEWELRY.

The Tunic, China Lace, and That Novel Tint, Jade-Green, Are the Results for Women of War in the

(Correspondence of the Dispatch.) NEW. YORK, April 13.-When Japan undertook to administer a licking to China few American women felt any interest in the fracas, and not one of them suspected that this squabble in the East was about to affect their fashions. That it has done so is plainly evident.

CHINA SUPERSEDES JAPAN. To begin with we were tired to death of everything Japanese. Fans and parasols and screens and lacquer had become a weariness, and the Kimono a burden. The Japanese had dumped so much waste upon us that even our large capacity for purchasing trivialities had been exhausted. The Chinese have never troubled themselves to sell us anything but tea, so what comes to us from there now is not merely manufactured to catch the eye, but are the real things they have worn and used themselves. For there worn and used themselves. For there has been a terrific breaking up of everything in China since the war began. Though the Japanese have behaved wonderfully well, it is impossible for an army to occupy a country without a prodigious lot of loot falling into its hands, one way or another. Families have been swept away or have fled from their homes, and all their goods scattered to the four winds. Ruin and distress have forced others to sell their luxuries, and the spoil of this great revolution has been pouring into Europe and America by the shipload.

Paris, always ready for novelties, has seized with avidity upon the new goods, and what Paris uses and wears New York wears and uses.

A NEW GARMENT FOR WOMEN. A NEW GARMENT FOR WOMEN.
One of the prettiest of these new fancies is the use of the Chinese tunic—that locse, while-sleeve garment that falls to the knee as part of a morning or teagown combined with the eternal and ubiquitous chiffon. The Princess de Sagan has two of these. One is a loose slip of white silk covered with white chiffon. The sleeves are close-fitting to the wrist and at the neck is a great frill of lace held in place with half a dozen torquoise pina. Over the whole is slipped a tunic such as is worn by the great court ladies of the over the whole is supped a tunic such as is worn by the great court ladies of the Flowery Kingdom. This is of paic-green silk embroidered in blue flowers of that curious shade of bine that comes only from China; the embroidery so close that from China; the embroidery so close that the flowers give almost the impression of shaded blue scales overlapping each other. The edge is finished with a narrow border of black satin, and a line of gold thread, and this negligee has a most rich and bizarre effect of color. The other tea-gown has the silk and chiffon underslip of dull soft pink, the tunic being of black satin embroidered in gold, and that clear shade of red that the Chinese that clear shade of red that the Chinese called dragen's blood.

SEVEN ORIENTAL JEWELS.

The jewels worn with it are of the beautiful parrot blue enamel on silver for which Manchu jewellers are famous. There is one of the blue dragon-fly pilns in the hair; a great ear-ring turned into a brooch clasps the fluify ruffles at the throat, and at the belt hangs one of the chatelaines, of which Chinese ladies are so fond, including the moon-shaped perfume box, the flexible sacred fish, and the images of the God of the Heavens.

ODD TRINKETS AND COLORS.

This Manchuria jewelry has already appeared in New York, and has been seized upon with avidity as a delightful new addition to the rich woman's Joual-lerie re fantasi—as the Parisians call the ornaments which change with the fashions. Frederic Villiers, the war correspondent, who has just returned from the seat of hostilities, has brought a beautiful collection of bracelets, pins, buckles, earrings, hair ornaments, chatelains, lockets, and rings of the most delicate and fantastic gold cut-work, silver, silver-gilt, and blue and green enamels on silver and gold. and rings of the most delicate and fantastie gold cut-work, silver, silver-gilt, and
blue and green enamels on silver and gold.
The ear-rings are far too big for American ears, but make rather splendid
brooches, and one very un-to-date woman
appeared at the first night of "The Ideal
Husband" in a wide skirt of new black
moire satin, a bodice of white chirfon and
lace, and a long-fronted Eton jacket of
stem-green silk, with buttons made of
old blue-enamel Manchu buttons. Her
bonnet was a knot of black tulle drawn has written it, in italicised letters, that young women of the smart set shall not bicycle alone, or only in the company of other women. Her good reasons are that it is neither safe nor easy, and so the small groom has had an occupation found for him. At an easy gait he wheels along on an excellent machine, about twenty paces behind his mistress, neatly garbed.

St. Andrew's club-case strapped to his side, and everywhere this useful little groom goes, when exercising the bull-terrier, hunting gay balls and carrying notes, he shows on the buttons of his livery and clasp of his riding belt monogram and initials like those stamped on his mistress's note-paper.
